

DECORATION DAY.

The suggestion has been made, and at a very opportune moment, that Reno should begin to make preparations for a proper observance of Decoration Day. Last year we did as well as was possible in the short time allowed, but there was no such general recognition of the occasion as there should have been, and now that time has been taken by the forelock in sounding the notes for preparation, it ought not to be a difficult matter to have a celebration this year completely worthy of the occasion, and one which will be a source of satisfaction to every resident of the county, for the day can easily be made a gala one, and not be confined exclusively to Reno, but participated in by every town and hamlet in the county. There are but few resting in our cemeteries who in life wore the blue, none we know of who wore the gray, but there are enough of them to be covered over and over with beautiful flowers, and crowned with garlands as a tribute of patriotic love.

The Confederate graves and monuments at New Orleans were handsomely decorated Friday. The Association of the Army of Tennessee, assisted by a delegation from the Association of the Army of Northern Virginia, Friday laid the corner stone of a monument to the Army of Tennessee. General Charles E. Hooker, of Mississippi, delivered the oration. On the same evening the Association of the Army of the Tennessee had their annual reunion and banquet. Incident to the ceremony of decorating the graves of the Confederate dead and laying the corner stone of a monument to be surmounted by an equestrian statue of Albert Sidney Johnson, was an oration delivered by Jefferson Davis, in which he eulogized the character of the dead leader. Johnson was recognized as a strong pillar of the Confederacy, and when he fell on the field of Shiloh, the mightiest column which sustained the cause had fallen. He died in a moment of victory, and had he lived half an hour longer he would have made Grant prisoner or a fugitive. The Confederacy had three great leaders—Lee, Jackson and Johnson—who would compare with the leaders of antiquity or modern times.

Daggett has been heard from. The Secretary of State has transmitted to the Treasury Department a report from R. M. Daggett, Minister resident of Honolulu, with regard to statements recently made by the effect that Chinese sugars are being imported at Honolulu, thence to be shipped to the United States as Hawaiian sugars, which pay no duty. Mr. Daggett says that after a thorough investigation he is satisfied the statements above referred to are entirely without foundation.

The Hibernia Bank, of San Francisco, is the "boss." The California Commissioners have just examined into its condition, and report its resources at \$20,079,085. It has a reserve fund of \$1,253,150. Its deposits aggregate the large sum of \$18,615,084. The Hibernia has been well managed from the start, and deserves the high standing it has attained.

Justice Pomeroy, of Virginia, tells the Enterprise, that the fees have been reduced more than one-half, and consequently it is impossible for him to make much of a showing in the way of monthly collections. The Journal is not aware of any fee bill passed by the late Legislature which takes effect until 1885.

It transpires that Governor Butler's proclamation for which he is so severely criticised by the Boston press was the same proclamation verbatim of Governor Gore in 1810. Butler says: "All criticisms are directed against that learned and pious man, not against me."

The indications are now that the Republicans of Pennsylvania will be fully united in the next campaign, the managers having had a realizing sense of the strength of the Independents. The Independent Republicans are said to be satisfied with the result.

The earnings of the Carson and Colorado road were \$3,000 more last month than in any previous month. The road is building up Esmeralda and Esmeralda is building up the road.

Washoe county's assessment roll for 1883 will be over \$4,000,000. Washoe is the first county in the State and proposes to maintain the leading position.

Tilden is being groomed for 1884. Sammy will be a hard horse to curry in or out of his party.

We must have a State Fair this year as usual.

TUSCARORA MINES.

Argenta Or. to be Milled—Ore in Grand Prize—Prospecting Work in Nevada Constantly Carried On—An Improvement in the Belle Isle.

[Mining News, 6th.]

For some time past the street has been filled with rumors to the effect that the Grand Prize-Argenta mill would be started about the middle of May. Some said on ore from the Grand Prize and other that Argenta ores would be crushed. Yesterday the reporter sought Dr. Dixon, the superintendent of those mines and the mill, and from him gathered that it was the intention of the company to start ten stamps of the mill about the middle of May, and the first ores crushed would be from the Argenta. The mines, under Mr. Dixon's supervision, are looking well and promise much. The water has materially decreased, and the circulation of air is now good. On the 500 level of the Grand Prize in a west drift there has been some excellent ore encountered in the foot wall that may possibly develop into an ore body of considerable importance. The ore was found the past week, just behind a break that occurred in the ore body worked years ago and the drift has not penetrated a sufficient distance to determine its extent.

The usual work in Nevada is carried on. Two weeks hence the shaft will have reached the 550 level, where a station will be cut out and the mine probably opened out at that depth. At the same time, it is the intention to continue sinking the shaft until the 650 level is reached. While sufficient ore is taken out to pay all expenses and a dividend of \$25,000 per month, it should be borne in mind that one half of the expense of the mine is incurred in prospecting and opening the mine at other points than where ore is extracted, thus providing against the working out of one body of ore before another is found.

The Independence, in which work has been temporarily suspended to admit of repairs to machinery, will be started up again in a few days. In all the other mines work progresses as usual, and with the exception of the Belle Isle, in which a fine ore vein on the 350 level is constantly improving, there has been nothing unusual unearthed underground since last report.

The Rhode Island Election.

[San Francisco Chronicle.]

The total vote for Governor at the Rhode Island election on Wednesday was 24,062, divided as follows:

Bourn (R.) 13,101
Sprague (D. and I.) 10,236
All others 725

This is more than the usual total vote at a State election, but not up to the Presidential vote in 1880 by several thousands. The vote for Governor in April, 1880, was but 22,711, divided.

Republican 10,324
Democratic 7,440
Independent Republican 5,047

It appears from these figures that Sprague this year got 2766 more votes than the Democratic candidate had in 1880 and that the total of this year was 1,351 more than that of 1880, while the Republican vote is 2877 above that of 1880. The 5047 Independents of 1880 were this year divided, the majority of them going over to the regular Republican candidate and refusing Sprague. In 1880 the Republican candidate lacked 2487 of the majority over all. This year he has 2140 over all.

At the Presidential election, November, 1880, the Republican majority over all was 7180; total vote, 29,235. The Democratic vote at that election was 10,779, or 543 more than the vote for Sprague last Wednesday. It does not appear from these figures that the Republicans have lost any ground in Rhode Island. If they had all voted Bourn's majority would nearly have equaled Garfield's in 1880, and the showing is that William Sprague is a bankrupt quantity in the politics of his State.

SCHEMING FOR SAMMY.

New York Politicians Arranging to Resurrect Tilden.

A Tribune Albany special says: The recent mission of the leading Politicians of the country Democracy New York was not as has been reported, to oppose the city Charter, but to perfect certain machinery for the purpose of galvanizing the remains of Tilden and to bring him forward as a candidate for the Presidency. The programme has been planned by Tilden and Sam Randall, and certain leading politicians of Pennsylvania, who have spent a week in New York consulting with the sage of Gramercy Park. Lieutenant-Governor Hill was brought into the conference, and Manning of the Albany Argus will take charge of the programme. Dr. Schaefer, Cox, Kelley & Co. were not in the conference. It is understood, however, that overtures have been made to Kelley that no opposition will be made to his Charter if he will join in the new combination, and in this way harmonize the party. The scheme is to have New York present a solid front for Samuel Randall for Speaker, and Pennsylvania is to be made a unit for Tilden at the National Convention. Kelly has not yet given his adherence to the proposed new programme. William Scott, of Erie, is to be intrusted with a plan for harmonizing the Democracy of Pennsylvania and Dorsheimer and Cox are to be placated in the same way.

Judge Gresham's friends are already urging him as a Presidential candidate. They say that he possesses all the qualifications necessary in a candidate; that he has a brilliant record as a soldier, is an able Judge, an accomplished orator and sound on the political questions of the day and comes from a good locality. Indiana men insist that Judge Gresham could carry that State, which will be an important consideration in 1884. Gresham's friends are not less confident that he will be successful as an administrative officer, and they say that there never will be any doubt from the hour he enters upon his office who is Postmaster General.

BETTER TIMES AHEAD.

The Silver Lining to the Nevada Cloud.

[Carson Index, 6th.]

Here and there the signposts visible which indicate that it will not be long before Nevada will enter upon a new career of prosperity. The time is not far distant when mining as a wide spread and successful industry will give fresh life and vigor to the Silver State. This time it will be comparatively permanent and less subject to the fluctuations of the stock market. The legitimate development of wealth from hundreds of mines not known to the stock list will create a steady export of bullion, the proceeds of which in a large measure will be returned to this State instead of filling the coffers of California banks and millionaires. This desirable condition of affairs will be realized all the more rapidly so soon as the numerous railroads which are now crossing and penetrating the various portions of our State shall be brought to a legitimate business basis as common carriers instead of seeking to own the entire country through which they pass. Our boundless resources need only the helping hand of true commercial conditions to make them again the wonder of the world.

But just as things are at present there are not wanting very many men of courage to take hold of and develop the gifts of nature which are daily being brought within the range of accessibility. We believe the output of bullion is already upon the increase and that it will continue from henceforth to swell in volume. The coming summer will be distinguished from former seasons in the number of discoveries and developments of new mines.

Meanwhile the Comstock is daily producing a fair amount of bullion and has by no means been exhausted of its treasures. It is, however, so owned and operated that the general public have but little share in the production and in fact have but little reliable knowledge as to the grade of ore which are now being worked in vast quantities. The most that is known is that the prominent mines and mills are all more or less active and that a great mining industry is steadily carried on in the bowels of Mount Davidson.

Hand in hand with mining it is to be observed that our agricultural, grazing and stock interests are constantly growing in importance and extent. We believe that our State has the balance of trade against California quite heavily in the one article of beef. Agriculture is seeking to make its acres more broad and to devise improved and economical methods of irrigation. A knowledge of the many advantages and rich resources which Nevada affords in soil and climate has reached far beyond the Rocky Mountains, and it is more than a surmise that a portion of the enormous immigration to the United States which is promised for the present season will reach the silver State—adding to our population and productive power. We believe Nevada has reached the foot of the ladder, (she cannot go much lower) and is commencing to reascend. Those who remain here during the next decade will find unexpected and excellent opportunities for business and the acquisitions of wealth. Let the people be courageous and true to themselves. Their time is coming. Stay with the ship.

NEVADA INDIAN RESERVATIONS.

Some Good Reasons for a Consolidation.

[Elko Independent, 6th.]

There may be selfish motives underlying the advocacy of abolishing the Walker River Reservation by the settlers in that part of the State. There usually is in such cases; but that does not impair the virtue of the principle involved. There are too many of these reservations, and they are badly located for the good of the country. Walker River Reservation is one of these. There is no necessity for it; that is generally admitted. One reservation ought to suffice for one tribe. The Putes are not so numerous that they should be spread all over the State. It would be as well for them, and better for the whites, that they should be consolidated in some one locality. The lands included within the reservation are the most productive and valuable in Nevada. A few wandering savages monopolize the most fertile valleys, the best timber, the finest soil, in the State, to the exclusion of men whose labor and capital would speedily make them of value to the public revenue, as well as seats of prosperous homes and families. The consolidation of Pyramid and Walker River reservations would throw one or the other of these open to settlement. Either of them is large enough for all the Indians in the State, and especially for one tribe. While we should give the Indians sufficient room for all their reasonable wants, there is no justification for granting them the cream of the country. It is these reserved valleys that are really about the only spots fit for a white man to make a home in. Putes make little use of their reservations. Most of the time they are hanging around the towns, or working on the ranches elsewhere. The settlers of Nevada did not come here to support Indians, but to support themselves and families. As long as these immense and unnecessary reservations continue to exclude them from the public domain, Eastern emigrants will give us the go-by, and our early settlers continue to pull up stakes and look for lands that will produce something better than sagebrush. This reservation business has been, here and everywhere west of the Rocky Mountains, one stupendous blunder from the beginning; but between red-tape and sentimentalism it is likely to outlast this and several other administrations.

For weak lungs, spitting of blood, weak stomach, night sweats, and the early stages of Consumption, "Golden Medical Discovery" is specific. By druggists.

You can buy a first-class sewing machine twenty-five per cent. cheaper at Osburn & Shoemaker's than elsewhere in the State.

NEW TO-DAY.

Beyond the River.

Away Across the Mississippi is Held a Convincing Conversation.

"I tell you sir, that they are one of the most combinations ever produced, and my experience of that sort of thing has been wide enough to entitle my judgment to some respect."

"Oh, I don't know," responded the first speaker's friend, with a little yawn, as though he didn't take much interest in the subject. "I have never been able to see much difference in those things. They are all pretty nearly the same size, and made of about the same stuff."

The talk, of which the foregoing is a fragment, took place in Galatin, Missouri, not long ago, in the snug office of Dr. M. P. Flowers, one of the leading physicians of the State, who followed up the vein in which he had introduced it substantially in these words: "Nonsense, that's the sign of a boy, or rather a man who either doesn't know or doesn't care what he says. Those things, as you call them, are just as different as the moon is from green cheese. Now, liniments, lotions and ointments are very good in most cases for the relief of pain or inflammation. But, in the first place, they are unclean. They soil the hands and the linen, best left out of ways out of reach when they are most wanted."

"Well, my dear Doctor," sighed the traveler from the North, "what would you have? This is a wretched world anyhow, and nothing is ever at hand when it is wanted. You can't suggest anything."

"Yes, I can," broke in the Doctor, thumping the table with his fist. "I can suggest BENSON'S CAPSICUM POROUS PLASTER. I have tried it on my patients, and I have tried it on myself for an attack of pneumonia, and in all cases relief has followed in from three to forty-eight hours. The old plasters are stage coaches—the Capsicum is a telegraphic dispatch. For instance, in cases of Neuralgia, Muscular Rheumatism, Lumbago, retarded action of the kidneys, and—"

"I give it up, Doctor, and in case of need I'll buy Benson's," said the traveler, pleasantly. In the center of the genuine is cut the word CAPSICUM.

Seabury & Johnson, Chemists, New York.

CHANGE OF BUSINESS.

The undersigned have this day sold to Messrs. Martin & Augerstone their entire stock in trade and book account, in Reno, Nevada, who will continue the business, and we hereby recommend Messrs. Martin & Augerstone to all our former patrons.

BERRY & BOYD.

MARTIN & AUGERSTINE.

Referring to the notice of Messrs. Berry & Boyd, we hereby announce that we have purchased the entire stock in trade, business and good will of Messrs. Berry & Boyd, and will continue the business at the stand lately occupied by them, with increased facilities.

MARTIN & AUGERSTINE.

BREVITIES.

J. P. Foulks was in town yesterday. L. L. Crockett came down from Carson yesterday.

The Glendale farmers are busy cleaning ditches and sowing their grain.

The Grand Jury will meet to-morrow. There is nothing to come before them except the Crockett-Kinkaid cases, and those will be quickly disposed of.

Services at the Congregational Church both morning and evening. Sunday School at 12:15. All made welcome. A. B. PALMER, Pastor.

Services in the Baptist Church at 11 o'clock A. M. and 7 P. M. by the pastor Rev. E. B. Hatch. Morning subject: "Love for the Church." Evening: "The Day of Small Things." Praise service in the evening from 7 to 7:30 o'clock. Seats free and all made welcome.

Nevada National Guard.

Adjutant General Laughton, in General Orders No. 1, issued by order of the Commander-in-Chief, says: "The organized militia of the State of Nevada is hereby designated and will hereafter be known as the Nevada National Guard."

General Orders No. 3 are as follows: "For the purpose of carrying out the provisions of an Act of the Legislature, approved March 1, 1883, entitled 'An Act amendatory of and supplementary to an Act entitled An Act to provide for organizing and disciplining the militia of the State,' approved March 4, 1865, the Brigade Commander of the First Brigade is hereby ordered to report to these headquarters, within fourteen days from the date of this order, the two most efficient infantry companies in the county of Storey, and the Brigade Commander of the Second Brigade will report within the same time and to the same office the most efficient company in the county of Esareka."

It is generally understood that the companies to be retained in Storey county are the National and Emmet Guards—Companies A and B.

The Jacket Dividend Rescinded.

B. C. Whitman, attorney for the Yellow Jacket Mining Company, on Friday sent the following communication to the Trustees: "My attention has been called to the dividend declared by you at the meeting of April 4. Although there was sufficient money in the treasury of the company to cover the dividend and leave a large surplus for contingencies, and while the mine is now working at a profit which will soon warrant dividends if it continues, yet, upon investigation of the accounts, I think that such money does not come within the statutory designation of net profits, and, therefore, is not subject to distribution in the form of dividends. I refer you to Section 3,401, compiled Laws of Nevada. Knowing your desire to act strictly within the law, I suggest that your safer course is to rescind the dividend inadvertently made." In accordance with this, the Board passed an order rescinding the dividend.

Its History.

The San Francisco Examiner in its issue of last Sunday gives a history of the Knights Templar in the United States, which is very interesting to those who are in the Order. The knightly dignity appears to have first been conferred in this country by St. Andrew's Chapter, now known as Boston Commandery, in August 1769. The paper traces the history of the institution down to the present time and is a continuation of articles on the subject in its previous Sunday issues.

A Fine Fee for a Public Administrator.

There is an exciting search being made in San Francisco for the will of the late Thomas A. Blythe, a millionaire, who died last Tuesday. If none can be found the Public Administrator, Philip A. Reach, will have to administer. In that case, his fees, etc., will reach over \$100,000.

Pistol Lost.

A double-acting Colt's pocket pistol, 38 caliber, has been lost near the Pavilion. Finder will be liberally rewarded upon leaving the same at the Journal office or Justice Court rooms.

Against the County.

The case of Constable Nash against the county was tried before a jury in Justice Young's Court yesterday afternoon, and a verdict for the plaintiff for the \$22, and costs, was rendered.

The best known remedy for coughs and colds is the Infalible Cough Mixture prepared by Osburn & Shoemaker.

A splendid stock of fresh garden, field and flower seeds just received at Osburn & Shoemaker's.

AGRICULTURAL SOCIETY.

Annual Meeting and Election of Trustees—Secretary's Report.

At the annual meeting of the N. S. A. M. & M. S. yesterday, 600 shares of stock were represented and the following gentlemen were elected Trustees for the ensuing year: W. R. Chamberlain, Jno. B. Williams, Jacob Stiner, A. A. Longley and Al. White. The Secretary's financial report was read and accepted. A vote of thanks was tendered Hon. C. C. Stevenson, W. R. Chamberlain and others. Annexed is Secretary Roff's report for 1892:

RENO, March 26, 1893.

To the stockholders of the Nevada State Agricultural, Mining and Mechanical Society—Gentlemen:

In presenting a report at this annual meeting of the Society, it is proper that a review of the work performed by this Board should be had. Immediately after the election and organization of this Board, D. B. Boyd was elected Secretary, who resigned, and N. W. Roff was appointed in his stead. Frequent meetings of the Board were held and steps were taken to hold the Ninth Annual Fair. It was found that the Society was not in a position financially to undertake a Fair, and private subscription had to be solicited. Our citizens subscribed liberally, considering the depression of business, and the present Board received encouragement and assistance in many ways. The weather was our greater disappointment, a heavy rain prevailing during four days of Fair week necessitated the postponement of a portion of the programme till the following week, at great inconvenience and loss, both to horsemen and the Society. It was well known that our speed ring, the entries to races and the Pavilion were unusually attractive, and had the weather permitted there would have been a large attendance, and success would have been assured.

It was impossible to pay the premiums owing to the great expense incurred in giving the Fair. Our speed programme was carried out as nearly as possible and the purses all paid. This was done to encourage the horsemen who had visited us, and to send them away with the feeling that notwithstanding the bad luck that had overtaken us we were willing to do the square thing. The grounds and buildings were put in proper repair and order, and all bills contracted by this Board were paid. We would beg leave to suggest that the incoming Board take steps to hold another Fair, but would suggest that the time for holding be made at an earlier date, and that similar purses be offered and the contests be confined as far as possible to our own District. This we believe would give better satisfaction, encourage our stockraisers more, and would prove financially successful to the Society. In conclusion we desire to extend our thanks to the press of the State for favors, to Hon. C. C. Stevenson, Wm. R. Chamberlain, and our citizens generally for assistance rendered, and advice offered. Below we give a complete statement of moneys received and paid out during our service, hoping the same will meet your approbation:

RECEIPTS.

Bills payable July 1, '92, (borrowed from 1st Nat'l Bank)	\$ 100 00
Collected on subscriptions	1,407 35

T. K. HYMERS, Pres.

NATE W. ROFF, Sec'y.

The political campaign of 1893 will be opened by the Kentucky Democrats, who, within a few weeks will nominate a Governor. Proctor Knott has already shield his name into the ring. He hopes to be, first, Governor, then Senator, and finally President Knott.

CARSON MEDIUMS.

The City Going Wild Over Spiritual Manifestations.

The Eureka papers tell of Base range seances which take place in that section nightly. The Appeal says that in Carson the mania for spiritualistic phenomena has broken out and not a night passes that a circle of people are not gathered in one or more houses trying to get manifestations. There are more confirmed believers in spiritualism in Carson than most people are aware of, and the Appeal knows of numbers of people here who without making the slightest pretensions to mediumistic powers are able to get raps by sitting quietly for half an hour at a table.

A RECENT CASE.

While not mentioning names for obvious reasons, the Appeal takes the liberty of describing something which came under its personal observation. The editor was sent for a few weeks ago to attend a seance in which a little girl about twelve years old was the medium. Tests were allowed and she was finally tied to a chair. The lights were turned down and in a few minutes she was free. The test was not conclusive, as her hands were small and wrists quite supple. The slate test was next in order. She wrote the first name of a man asked for who died some years ago in California. And afterwards when asked as to the manner of his death she wrote without hesitation "shot through the heart," which was quite true. She then laid her hands upon the table and the rapping was distinct, and loud enough to be heard in the next room. On the child's saying that she could produce raps anywhere, the writer produced a square tin can used to store bread in and placing it in the center of the floor, asked the girl to produce raps with the light turned up. She laid her hand on the lid of the can and without any movement whatever discernable, caused raps to come from the inside of the can. She then turned the light down and caused hands to manipulate the faces of those present. One of the party held the child's hands in his own, but this made no difference. Hands much larger than the child's stroked the writers face and though he turned a lamp up to full blaze the instant he felt the touch he discovered nothing.

A DECEITFUL CHINAMAN.

In the same house he interviewed the Chinese servant, who was quite an intelligent Celestial. He said he was about to leave the house because it was "debbled."

"Do you hear noises?"
"All time noise. Somebody knock all night; first I think mabby rat, then I get up belly times one night and chase debble all over house. No catches. Rap on woodbox, rap on waller, rap on stove, rap on floor, alles same rap on stovepipe."

"Did you see anything?"
"You bet, I see little red debble alles same two feet high walkee all over."

"Anything else?"
"I see my mother, she come last night and kick me in bed. So now I leve here."

On the same morning he had announced that the ghost of his mother had appeared to him in his room and that he would leave. He left next day, a proffered advance in wages being no inducement to stay.

CURIOUS THINGS.

The mother of the child stated that for several months past there had been manifestations in the house, the knockings following the child about everywhere. At times noises could be distinctly heard and things moved about over the table apparently of their own volition. On one occasion the spirits wrote on a slate that a neighbor's child had just joined them. It was 8 o'clock and a member of the family went to the neighbor's house and found that the child had indeed died at the hour announced. Persons who have attended private seances in this house solemnly aver that they have seen forms materialize in the room as many as five or six at a time, and that when the child had been tied up with handkerchiefs and the light dimmed the forms of the spirits can be distinctly seen untying the child. The writer visited the house twice, but was unable to see anything that smacked of materialism.

THE BOY MEDIUM.

There is a young boy in this city who claims to be a materializing medium. Persons who have visited the seances assert that he can materialize in broad daylight and has done so to the satisfaction of the most skeptical. On one occasion nearly a dozen persons were present and when the spirit of a dead man was called for he walked into the middle of the room and was in sight nearly a minute. All present expressed themselves as satisfied that they had seen the ghost called for. The reports which came from this boy's performance are of the most staggering nature. He either does the most wonderful things or about half the people of Carson, who have the reputation of being sober and truth telling, have formed and incorporated a lying association of stupendous dimensions.

CAN PRODUCE RAPS.

There is a well known gentleman of

this city who asserts that anyone who will give his mind wholly to the matter can produce raps on a table. He said, "I was told by a medium in whom I had great confidence that if I would spend half an hour a day with my hands on a small table I would in a few weeks get tangible raps. I practiced this nearly two months but got no response. I was sick and disgusted with the thing, but he kept urging me so persistently that I persevered and one evening was startled by a distinct rap under my hand. From that on I had no trouble and now I can produce the raps in open broad daylight." The writer afterwards accompanied the gentleman to his house to test the matter. He sat about ten minutes at a small table entirely open beneath and presently the raps came very distinctly. The writer placed his hand on the table and could feel the vibration of the blows on the table. The raps continued about ten minutes. The room was quite light it being about three in the afternoon.

ANOTHER CASE.

There is also reported the case of a young lady about sixteen years of age who has suddenly developed into a writing medium and gives seances nightly. As far as the writer can ascertain there are five mediums in Carson who give seances to their friends for the sake of pastime and amusement and the excitement in the matter grows apace.

A NEW FIRM.

Martin & Augustine, Successors to Berry & Boyd.

W. O. H. Martin and M. B. Augustine, constituting the firm of Martin & Augustine, yesterday purchased the stock, book accounts and good will of Berry & Boyd, and will hereafter continue in business in the house made familiar by Manning & Duck, Manning & Berry, and Berry & Boyd. The JOURNAL is glad to have the old establishment fall into such good hands as those of Messrs. Martin and Augustine, both of whom are live and honorable business men, and have the money and backing to maintain a leading position in Washoe county business circles. Mr. Martin was formerly State Senator from Ormsby county, and for years a member of the house of Studmiller & Co., of Empire, while Mr. Augustine was for years a member of the firm of Walter & Co., Silver City, so that by reason of experience, integrity and financial strength, these gentlemen are a decided acquisition to Reno, and the JOURNAL trusts they will do so well as to always feel that they did a good thing when they concluded to make Reno their home.

THE NEVADA AND OREGON.

Slight Prospect of an Immediate Renewal of Work.

The JOURNAL has no hope of a renewal of work on the Nevada and Oregon Railroad within the next two years. The New York bondholders have instituted, in the U. S. Circuit Court, proceedings to foreclose. This suit will undoubtedly be opposed by parties who have claims against the road for labor and material. They will intervene, and the proceedings will drag along for two or three years. It is a great misfortune that such an inviting enterprise should have been so brutally murdered in its infancy.

New Patents.

Dowey & Co.'s Scientific Press Patent Agency has official reports of the following U. S. patents issued March 27, 1893:

L. D. Craig, S. F., plug stop valve; L. D. Craig, S. F., revolving water closet stretch trap; E. Detrick, S. F., seam for grain bags; A. P. Gross, S. F., harness coupling; A. D. Kilborn, Tucson, A. T., safety valve; A. H. Lighthall, S. F., underground cable railroad; A. H. Lighthall, S. F., gripper for traction cables; M. J. O'Leary, Chico, Cal., surcingle; Mary A. Merrill, S. F., sketched's easel; W. B. Morris, S. F., railway safety alarm; Jos. Murphy, San Jose, Cal., railway switch; M. J. O'Leary, Springfield, Cal., bridge bit; W. B. Robertson, Jr. S. F., obtaining boracic acid from borates; A. Savage, Salem, Or., cord grasper and outter for grain binders; R. Waegeman, S. F., screw clamp for stools.

Advice to Mothers.

Are you disturbed at night and broken of your rest by a sick child suffering and crying with pain of cutting teeth? If so, send at once and get a bottle of Mrs. Winslow's Soothing Syrup for Children Teething. Its value is incalculable. It will relieve the poor little sufferer immediately. Depend upon it, mothers, there is no mistake about it. It cures dysentery and diarrhoea, regulates the stomach and bowels, cures wind colic, softens the gums, reduces inflammation, and gives tone and energy to the whole system. Mrs. Winslow's Soothing Syrup for Children Teething is pleasant to the taste, and is the prescription of one of the oldest and best female physicians and nurses in the United States, and is for sale by all druggists throughout the world. Price 25 cents a bottle. feb. 21-sw-lyr.
